## **In with the New: McKinley Resources Launches New Website and Product Lines**

*from McKinley Resources, Inc.*

### **The McKinley Resources Website: [www.mckinleyresources.com](http://www.mckinleyresources.com)**

McKinley Resources has launched a website that showcases a wide variety of specialty chemicals, raw materials and services. McKinley Resources seeks to be a one-stop source, equipped to supply quality products and provide customers with the product information they need. The user-friendly layout makes it easy to search the website, locate a product of interest, request samples, and view or download technical information and white pages with a few simple clicks. The website also educates users on the nature and potential applications for McKinley products. Please visit [www.mckinleyresources.com](http://www.mckinleyresources.com) to learn more about how McKinley Resources can benefit your company.

### **McKinley Skincare: Beautiful Benefits**

Do you want to develop more effective formulations? Today's consumers are looking for skin care products that work faster and better. Thus, manufacturers need ingredients that deliver great results. The new McKinley Skincare product line includes an assorted group of active ingredients, which are proven to effectively improve skin. This product line is recommended for anti-aging, anti-acne, anti-oxidant, and skin lightening benefits. Do you need proof of product efficacy? McKinley Resources can provide customers with experimental data to substantiate product claims, so they know they're getting a great product.

### **McKinley Oil Field Chemicals: Protect and Save**

Corrosion, scale build-up, and accumulation of harmful gases are an unfortunate part of oil and gas production. The McKinley Resources Oil Field product line helps customers save money and reduce safety risks by protecting equipment and reducing the presence of harmful gases. This product line consists of chemical intermediates that include corrosion inhibitors, hydrogen sulfide scavengers, and scale inhibitors.

### **About McKinley Resources**

McKinley Resources is located in Dallas, TX and is a distributor of over-the-counter active ingredients, cosmetic specialty chemicals and flavors. McKinley Resources focuses on providing individualized and customized solutions for customers concerned with cycle-turns, looking for unusual materials and small container sizes.

McKinley Resources is a regional representative for several leading specialty chemical manufacturers focused on providing solutions for anti-aging, anti-inflammation, cellular regeneration, anti-glycation, and moisturization with clinical claim substantiation. McKinley Resources, Inc. also provides access to a variety of off-the-shelf and/or unique flavor creations.

McKinley Resources has been in business for over 10 years and we take pride in providing our partners with a short lead-time, competitive pricing, irradiation services, and superior customer support. For more information, please feel free to email us at [info@mckinleyresources.com](mailto:info@mckinleyresources.com).
